- MySQL
- RESTful API
- Version Control System (Git)
- Problem solving
- Strong Communication
- Good time management
- Can work under pressure and
- handle multi-tasks

LANGUAGES

- English   (Intermediate-level)
- Japanese (N2)

YING MO HOM

JUNIOR WEB DEVELOPER

PROFILE

A Software Engineer who is seeking rewarding career in the Information Technology sector where I can utilize my skills and knowledges. A fast learner and always active to learn new things. Can work well both in a team environment as well as using own initiative.

WORK EXPERIENCE

Software Engineer Internship
March 2023 - July 2023

- Developed sample projects using PHP, Laravel, and jQuery, showcasing proficiency in modern web development technologies.
- Created interactive and dynamic web applications, utilizing Laravel's MVC architecture and jQuery's DOM manipulation capabilities.
- Collaborated with team members to design and develop database schemas, RESTful APIs, and data integration functionalities.
- Implemented security measures, including input validation and protection against web vulnerabilities.
- Utilized Git for efficient code management and collaboration.
- Designed and implemented responsive front-end interfaces using HTML, CSS, and jQuery, ensuring consistent user experience across devices.

EDUCATION

University of Technology (Yatanarpon Cyber City)
Specialized in Information Science Technology .
(2016-2020)

PROJECTS

LIBRARY MANAGEMENT SYSTEM

- Build to provide librarians with an efficient and effective way to track and manage the library's inventory, as well as facilitate the borrowing and returning of items by library patrons.
- Used : PHP , Laravel ,MySQL.

PRODUCT REGISTRATION SYSTEM

- Developed a product registration system using Laravel, enabling the creation, retrieval, updating, and deletion (CRUD) operations for products.
- Integrated jQuery's AJAX capabilities to enable seamless category creation without requiring a page reload.
- Implemented server-side and client-side validation to ensure data integrity and prevent common web vulnerabilities.
- Utilized Laravel's routing system to handle requests and responses for product CRUD operations.
- Implemented search and filtering functionalities to enhance the user experience and enable efficient product retrieval

GORGEOUS WITH 4RS

- Build to provide a platform for individuals and organizations to learn about recycling and waste production.
- Used : HTML ,CSS and JavaScript.

BUDDHAWIN

- Build to provide a website that can easily learn the biography of Buddha.
- Used : Java EE and MySQL.
